

# Keenan Hye

Acoustical Engineering graduate student with a passion for audio and acoustics

---

## Education

- **Summa Cum Laude Graduate** - Bachelor of Science in Electrical Engineering with a minor in Music Recording from Northeastern University.
- **GPA** - 3.858
- **Current Candidate for** - M. Eng in Acoustics from Pennsylvania State University
- **Notable coursework** - DSP, Communication Systems, Noise and Stochastic Processes, Linear Systems, Algorithms and Data Structures, Music Recording I-III
- **Honors** - Dean's List all semesters attended. Recipient of the Johnson Scholarship, Dean's Scholarship, and Amelia Peabody Scholarship at Northeastern University.
- **Senior Capstone** - Steerable microphone array system for the hearing impaired.
- **Extracurricular Activities** - On e-board of student chapter of ASA at Northeastern (2015-16), Independently researching perception of audio quality versus encoding bit-rate, intensity, SNR.

## Work Experience:

- **Bose Corporation** | Jan 2015 - June 2015 (full-time)  
As Co-op in Measurements for the Music Industry, I was responsible for designing and testing an adaptive EQ algorithm for portable PA systems. This position allowed me to learn various technical skills, including acoustic measurement techniques, as well as improve my independent project management and data analysis skills.
- **Draper Laboratory** | Jan 2013 - Jan 2015 (15 months full-time, 8 months part-time)  
As Co-op in Instrumentation Electronics, I worked on two major projects: one an in-ear drug delivery system, and the other a network of accelerometers distributed across a structure. In this position, I learned countless technical skills and was a trusted and reliable team member for all of my projects. A bulk of my work involved designing and testing embedded systems, on both the software and hardware level.
- **Get Mastered** | Jan 2016 - Present  
I founded my own mastering service, Get Mastered, to apply my technical knowledge of signals and acoustics to my passion for music.

## Skills:

- **Software** - Matlab, C/C++, LabVIEW, various PCB designers, Logic, Pro Tools, Office
- **Hardware** - Acoustic measurement, soldering, electronics design, recording, mixing, mastering
- **Other** - Lead vocalist, guitarist in Yohannes, freelance mastering engineer, engineering tutor
